Duplo Filterbags

Van Borselen FILTERS

Polypropylene, Polyester and Nylon Media

Introducing the innovative, long life **Duplo Filterbag.** Providing up to 50% more surface area than conventional bags, the **Duplo** range is designed to give the customer increased life without any changes to the filter housings. Total filtration costs are dramatically reduced through the innovative "W" shape bag that has the added benefit of reducing Product loss.

Features:

- Increased surface area for longer service life and higher flow rates
- Reduction of operating costs
- Available with Polyloc® ring that creates hermetic seal to prevent liquid bypass and also available as steel ring version
- Unique Basket for all common types of Size 2 filter vessels
- Basket material: AISI 316 L
- Cotton handle for easier assembly and removal
- Reduced product loss results in significant cost savings
- Low disposal costs
- Available in all standard felt materials or NMO
- Wide range of micron ratings available
- Silicone free guarantee.
